Fades in the background

0.5sek white bg, and mic comes up

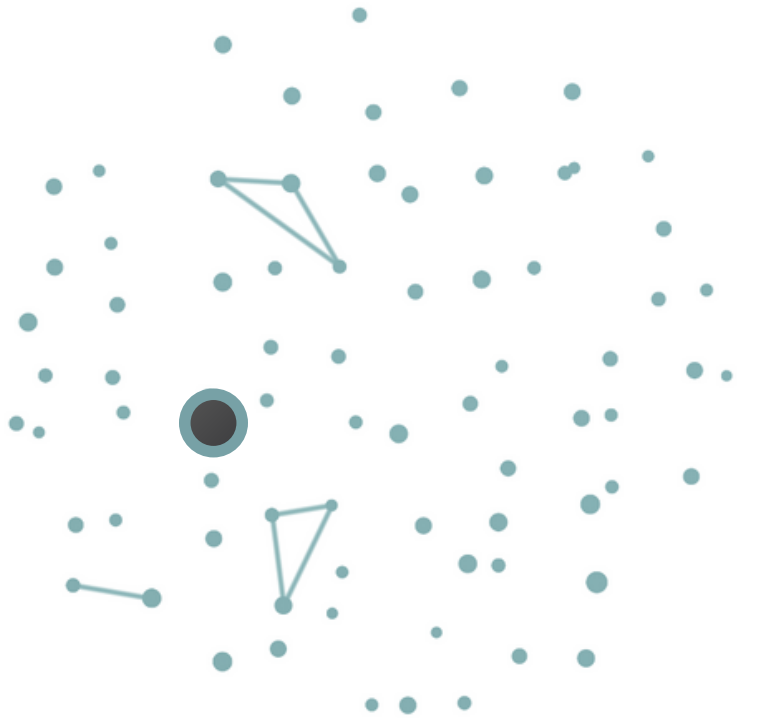

Mic moves as the user speaks

Immediately after user answers, synthesis pops up and is written out.

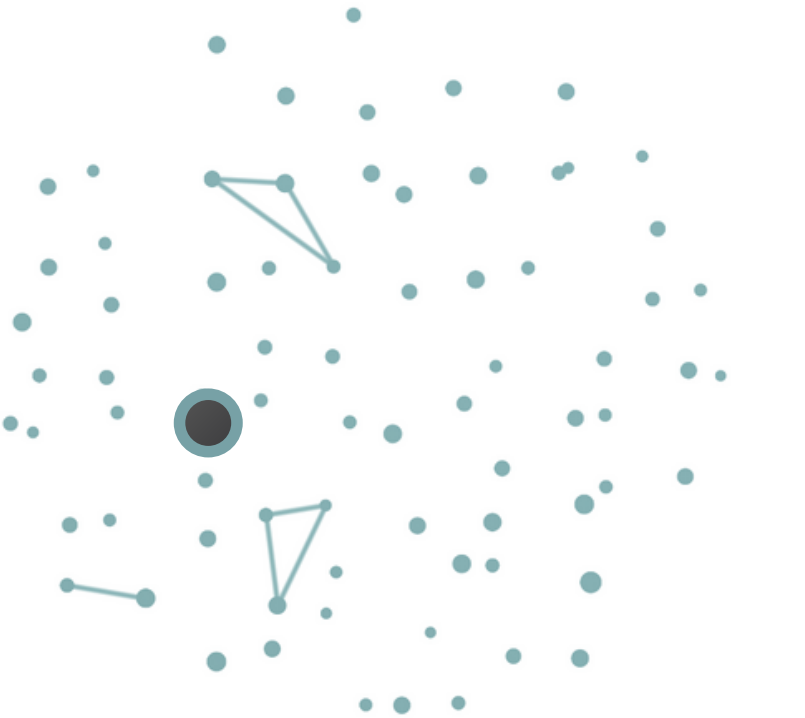

WITHOUT connections

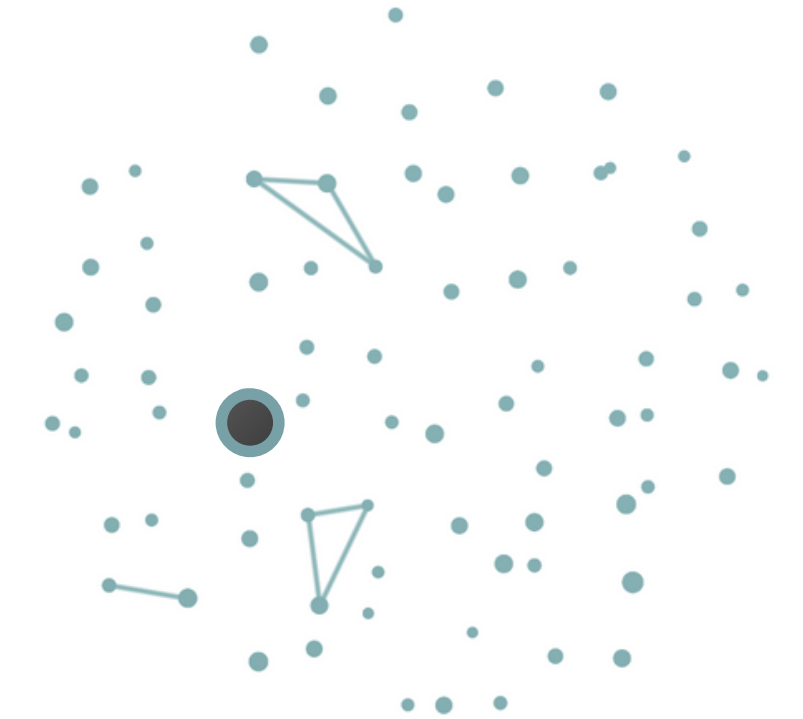

The synthesis gets smaller and finds its place in the graph. It starts moving together with the rest. Stops glowing.

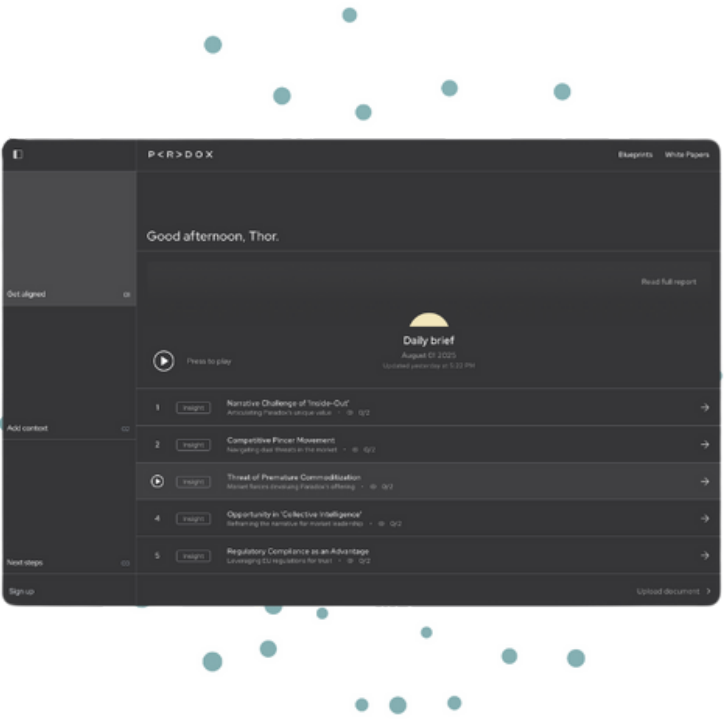

“Hyper alignment is setting off”

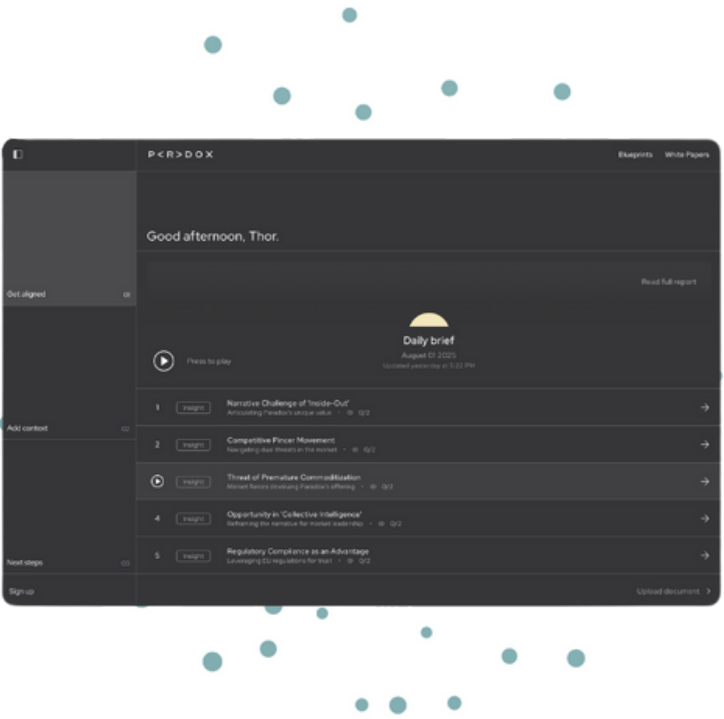

WITH connections - from HIS point

connections glow

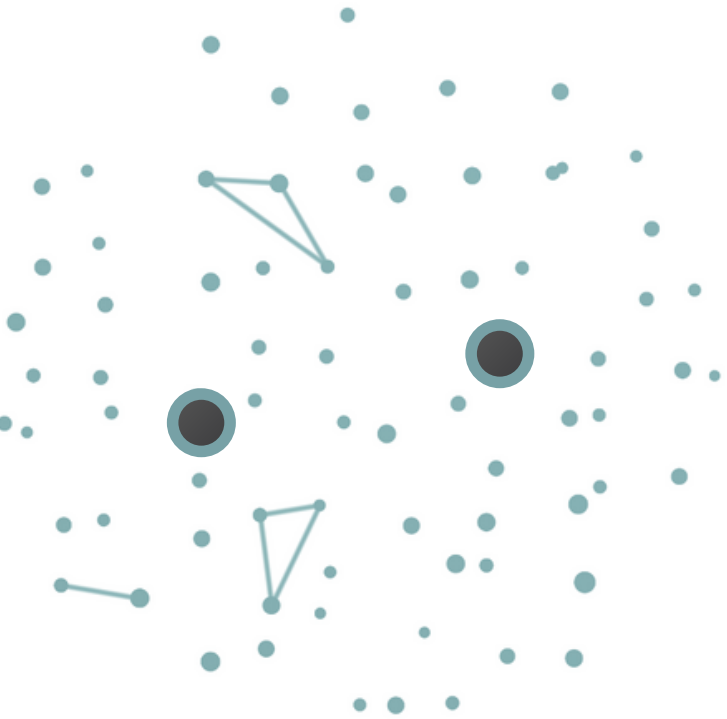

Olavs brief

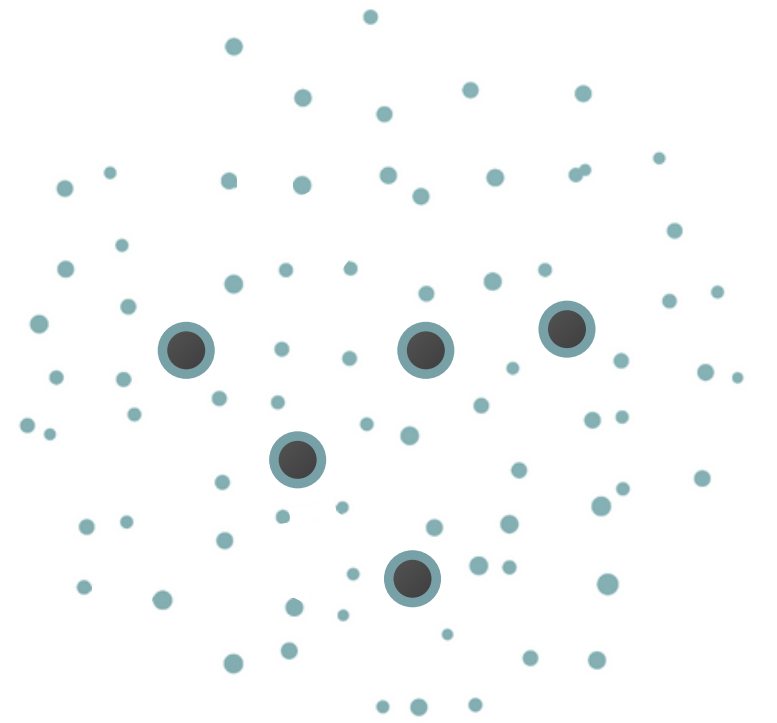

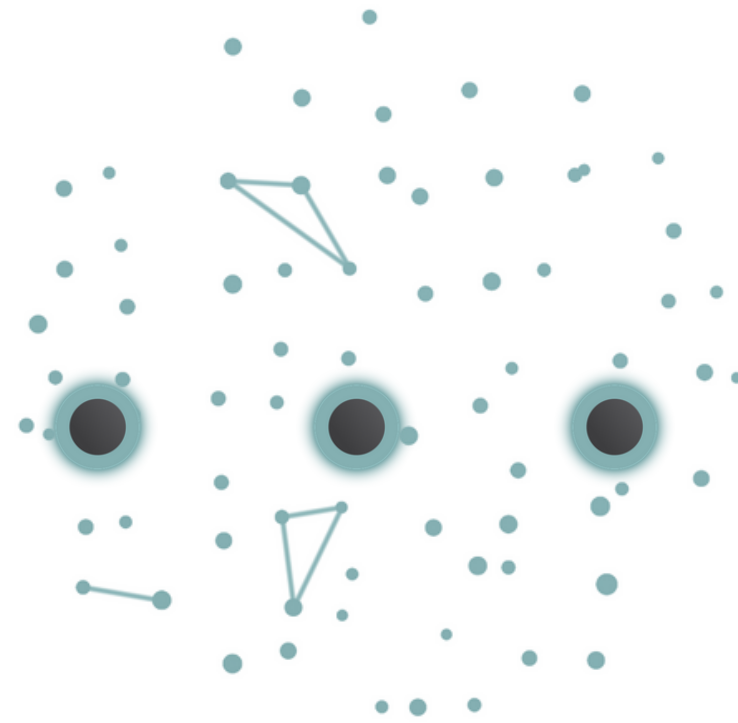

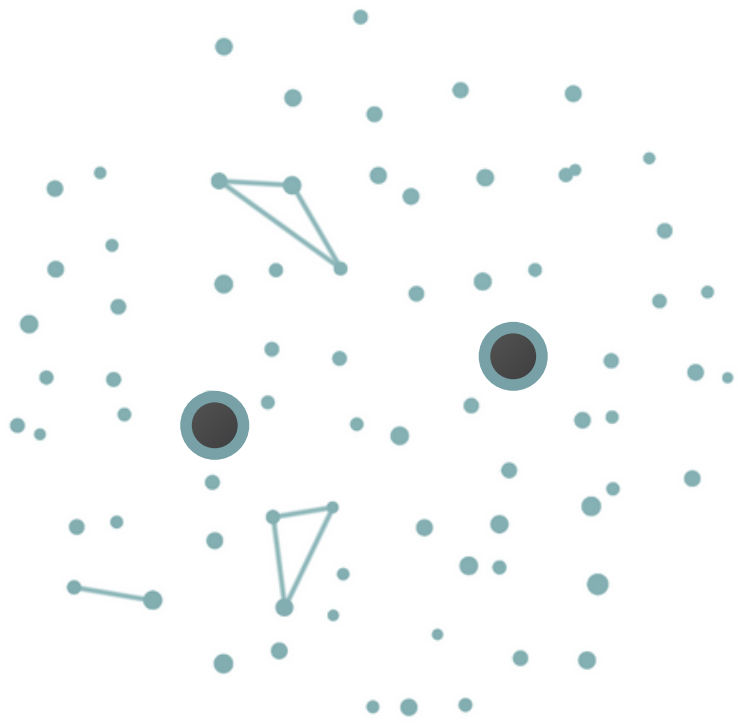

Olav finishes his brief

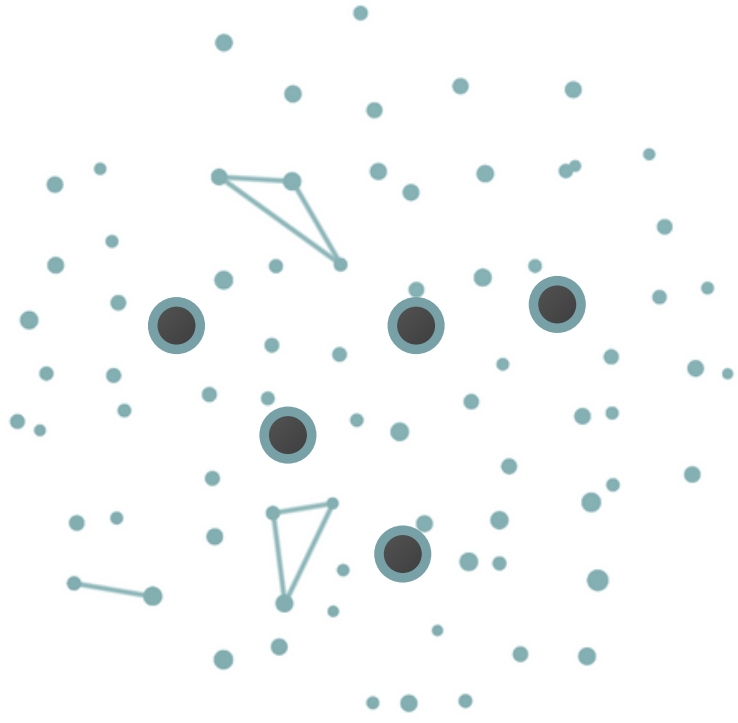

How?

Olavs brief goes into the graph

Olavs brief start new connections - from his point, and others

the 3 dots start a lot of connections

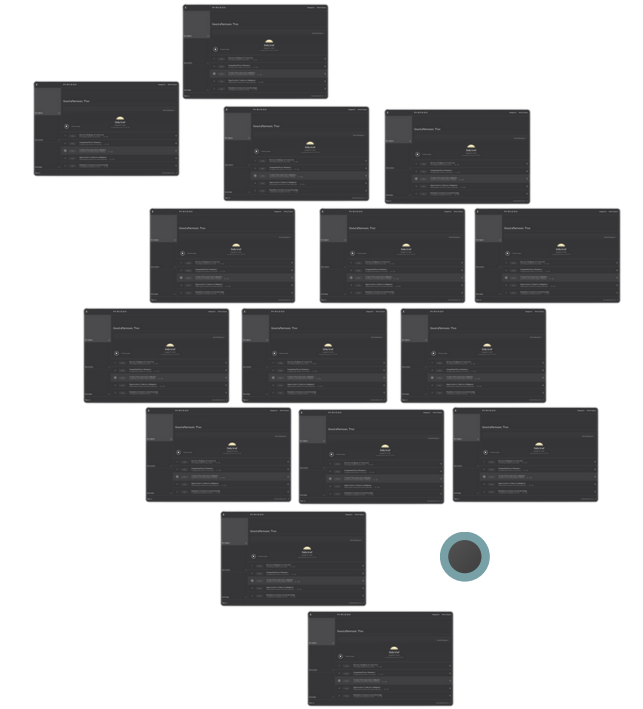

Dots go into the graph. Creates more graphs

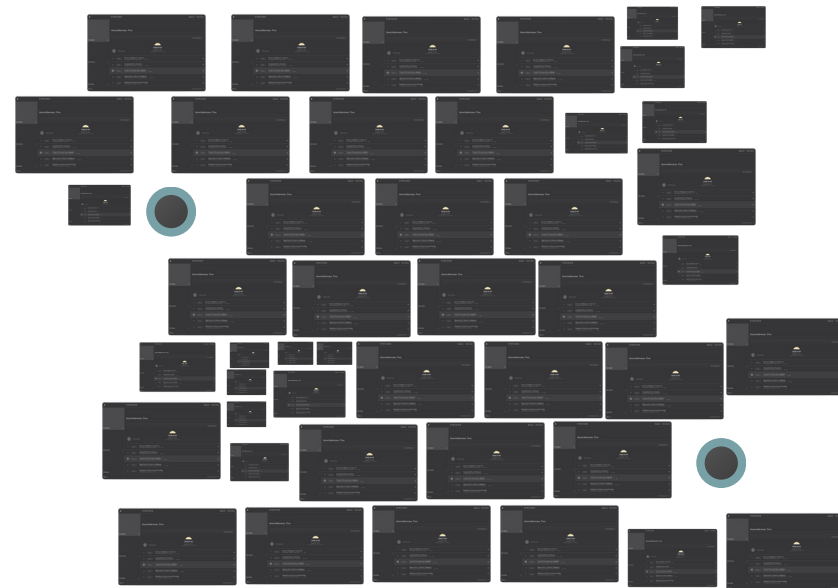

Graph fades away

Some briefs morph into dots, but the dots just blink and disappear, which triggers more briefs to appear.

They get more and more scattered, but still together.

They fill the screen. some smaller, some bigger

Small dots stop appearing at this point.

Brief flock takes a tour up the screen to behind the audience and comes back.

Briefs get ridiculously small, the color changes.
